OBJECTIVE

Motivated and detail-oriented B.Tech graduate, Software Developer, and AI Engineer with hands-on experience building .NET applications, machine learning, and generative AI solutions. Skilled in Python, C#, .NET, Java, C/C++, and data visualization tools (Power BI, Matplotlib). Eager to apply strong problem-solving skills and a growth mindset to deliver real-world software and AI solutions.

TECHNICAL SKILLS

- Programming Languages: Python, C#, Java, C, C++
- Frameworks & Technologies: .NET, ASP.NET
- Data & Visualization: Power BI, Matplotlib, R Programming
- Domains: Software Development, Machine Learning, Generative AI, Data Analysis, Software Testing

EXPERIENCE

Software Developer & AI Engineer

Aug 2026 - Present

Distinct Infotech Solutions

- Working as a Software Developer and AI Engineer, building applications using .NET while contributing to the design, development, and deployment of AI-driven solutions.

Software Tester (Freelance)

AI Fire Lab

- Performed software testing to identify bugs, verify functionality, and ensure product quality prior to release.

PROJECTS

VisionAid: Personalized Voice Assistant for the Visually Impaired

- Built a smart glasses system using Raspberry Pi and a camera to deliver real-time voice assistance for visually impaired users.
- Applied generative AI for multi-modal processing, enabling real-time object detection and scene-to-text conversion from live camera feed.
- Integrated a lightweight database to send enriched prompts to an LLM, generating personalized text responses converted to speech.

Driver Drowsiness Monitoring and Detection using Machine Learning

- Developed a drowsiness detection system using LSTM-KNN for face detection and Eye Aspect Ratio (EAR) analysis to identify eye closure.
- Implemented an alarm-trigger mechanism upon fatigue detection to support real-time driver safety monitoring.
- Achieved 81.5% detection accuracy, validating the system's suitability for real-world deployment.

EDUCATION

Bachelor of Technology (B.Tech)

Vimal Jyothi Engineering College

CERTIFICATIONS & TRAINING

- Python for Data Science - IIT Madras (NPTEL, 2025)
- Power BI - White Track Technologies (2024): data visualization, data modelling, Power Query
- Data Analytics using R Programming (2023): statistical analysis, data visualization, predictive modeling
- Humanoid Robotics Workshop - CUSAT (2023)
- Cyber Security & Ethical Hacking Workshop - IIT Delhi (2023): network security & ethical hacking concepts
